

## A System that is used World Wide

The exciting Codamotion system has been used by researchers, clinicians and engineers worldwide for over 25 years. In fact, our technical staff have been pioneering new techniques for automated motion capture since the 1970s. The technology has its roots in work by David Mitchelson in the early 1970s at Loughborough University in the United Kingdom. Today, David is Chairman of the company.

Choose codamotion for:

•High spatial and temporal resolution and accuracy (sub millimetre and >200Hz)

•Automatic identification of markers

•Real-time output of co-ordinate data with millisecond latency

•Pre-calibration

•Good ease of use, plug and play!

•Portability

Do you want to know more about the benefits of our core technology?

Visit us at [www.codamotion.com](http://www.codamotion.com)

We believe our innovative technology has advanced the science of movement measurement well beyond the capabilities of any conventional optical systems. The codamotion system provides a complete range of solutions which can be adapted to suit your requirements and your aspirations. From motion capture to complete integrated systems, we'll provide you with the highest levels of quality – backed up by a team of professionals.
